Dean Anderson

www.gljpc.com

We are independent advisors that conduct technical subsurface assessments and full project techno-economics for energy initiatives.

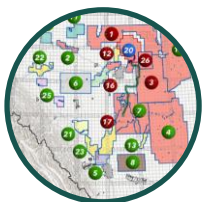

Our team of reservoir engineers and geoscientists advise clients in oil & gas, geothermal, lithium from brines, carbon sequestration, critical minerals, and emissions reduction.

Our objective is to reduce risk across the project life cycle.

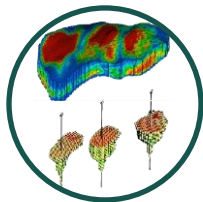

Technical Support Throughout the Project Life Cycle

Subsurface Screening & Site Identification

Modelling & Simulation

Economics & Scenario Analysis

Lender Technical Advisory

Field Development & MMV Planning

Regulatory Reporting
